Eastern Halkidiki

Its main characteristics

- An area rich in natural rotation
- 300km of coastline between three mountain areas protected by the European Convention Natura 2000
- 4000 plants and herbs in Cholomontas Mountain
- 404 of them at the Aristotelian Mountain

They are the same ones that led Alexander the Great to recognize the Asian flora

- Even richer the flora at Mount Athos
- 3 sea bays with crystal clear liquid volumes
- Famous production of fish and seafood
- Named plains and olive groves
- And...vineyards, wineries an

Its product

- The alternatively
- The green
- The Greek blue
- The gold of the convertibles
- The blessed air of the Mountains
- The rainy water pouring into the bays
- The wet soil
- The white sand
- The island Ammouliani
- The smell of the olive trees and wild herbs
- The forest
- The wood

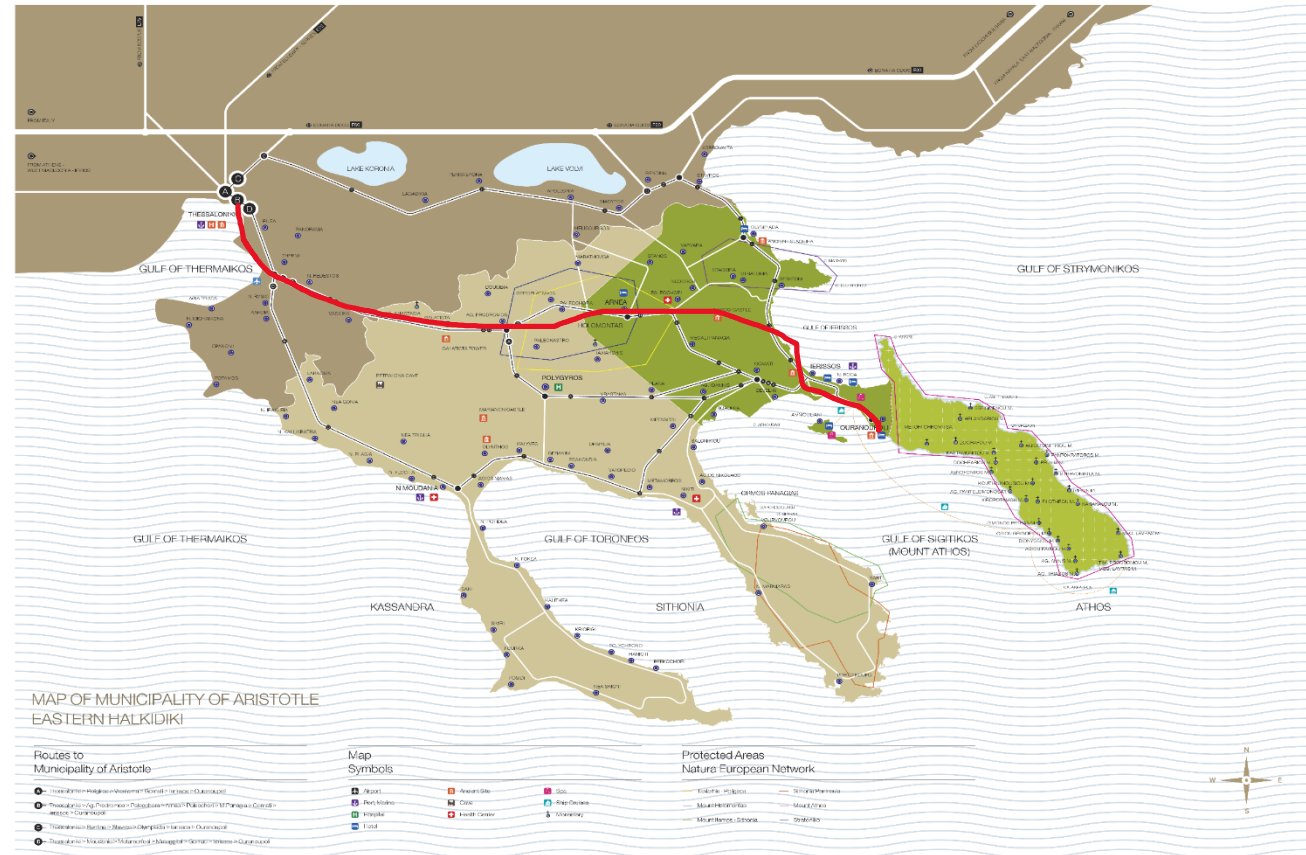

...and the gate for
Mount Athos, the
only alive
religious
monument in the
world.
